JEFF JOYE
Web Designer & Developer

A dedicated individual with 9+ years' experience of front-end development and a passion for UX/UI design. Collaborative team player networking effectively between various contributors to gather and communicate crucial information, all while using strong organizational skills to deliver compatible proposals in a timely manner. I believe in working in a professional and progressive environment.

EXPERIENCE

Web Developer
Qualico Corporate; Winnipeg, MB
November 2020 - Present

Full-time employee of large privately-owned real estate company.

- Building visually-appealing and functional websites in various environments using CMS softwares my own programming skills.

- Possess a strong attention to detail to final result; making sure everything was up to date for a client's request or matching perfectly to their mock design.

- Constant communication between developers, managers, and clients on various tasks, their status, and what was needed to complete the work.

- Management and focus from one task to another without loss of efficiency or detail.

Software Developer (Front-End)
Priceline Partner Network; Winnipeg, MB
July 2012 - July 2020

Full-time employee of major travel organization.

- Developed high-quality websites using HTML/CSS and TWIG and maintained functions built from PHP and React.

- Possess strong organizational and analytical skills to successfully manage and prioritize multiple projects.

- Interacted between fellow developers and managers to discuss client requirements and adjust plans as required.

- Displayed ongoing proactivity and dedication by supporting other team members with their workload, often researching and learning new languages and functions.
